

Putting Two Windows Side By Side

Sometimes you want to look at two windows at the same time. Let's open two game windows. Click "START" click "All Programs", click "GAMES" click "SOLITAIRE". Click "START" click "All Programs," click "GAMES" click "FREE CELL".

Now we have two windows opened. To put them side by side so you can look at both of them at the same time. Put your mouse arrow in an empty space on the "Task Bar" at the bottom of your window. Sometimes the space just left of your clock is good. Right click that space and a window will open with the options "Tile Windows Horizontally" and "Tile Windows Vertically". Either of these options will allow you to see both windows at the same time. Now click on "Vertically". This will put your windows side by side.
